Badr-Eddine TAHIR
Investment strategy
Leads portfolio strategy, quantitative modeling, and strategic asset allocation

Laura BIASINI
Equity Analyst
Focuses on stock selection, valuation, and ESG-integrated equity analysis

EQUITY

Aymane EZZAHER
Equity Analyst
Leads sectoral allocation and equity screening using a multi-factor scoring model

FIXED INCOME

Ilyes BEN SASSI
Fixed Income
Manages fixed income allocation across U.S. and European markets

Amin TARBOUCH
Risk Management
Manages portfolio risk, including VaR analysis and downside protection

Samia HMYENE
ESG Specialist
Leads ESG strategy and integration across investment processes

ABOUT TCP FUND

- **Fund Type** : Global Macro – Multi-Asset
- **Investment Horizon** : 3-5 years
- **Asset Universe** : OCDE Equities, US & EMU Sovereign Bonds, ETFs
- **Target Return** : 8.13%, Net annualized
- **ESG Integration** : Article 8 SFDR, Best-in-class
- **SRI** : **1** **2** **3** **4** **5** **6** **7**

INVESTMENT STRATEGY

4 Steps:

- Dynamic allocation based on macro views (assets, regions)
- Rigorous selection of stocks, bonds, and ETFs (ESG, quantitative, fundamental)
- Portfolio optimization (algorithms, risk management)
- Daily risk monitoring (correlation, stress tests)

TCP Kenz Global Alpha Fund

Fund Overview

TCP Kenz Global Alpha Fund aims to deliver superior risk-adjusted returns by capitalizing on structural macroeconomic shifts through a robust blend of systematic models, discretionary insights, and advanced portfolio optimization techniques. We integrate **ESG principles at every stage** of the investment process, targeting companies at the forefront of the global transition toward a sustainable, low-carbon, and inclusive economy.

Investment Philosophy & Objectives

At **TCP Kenz Global Alpha Fund**, we believe that macroeconomic regime shifts are key drivers of asset pricing. By anticipating these inflection points, we aim to generate consistent, risk-adjusted alpha. Our investment philosophy is rooted in a disciplined yet adaptive framework that combines systematic precision, discretionary global macroeconomic research, and a deep commitment to **ESG integration**.

Our objective is to outperform a globally diversified composite benchmark* over a 3–5 year investment horizon. This benchmark is thoughtfully constructed to reflect our multi-asset approach.

We implement this strategy using liquid, transparent instruments—primarily equities, bonds, and ETFs—ensuring both tactical flexibility and cost efficiency.

Target Portfolio

Benchmark : 50% MSCI World USD NTR Index - 20% JPM GBI Global TR Index - 15% Bloomberg Global Aggregate Corporate Index - 10% United States SOFR Secured Overnight Financing Rate - 5% Bloomberg Commodity Index

Investment Process

Idea Generation

I. Systematic Idea Generation

- Regime detection - Systematic Macro:** Through a designed nowcasting macro regime detector model.

- Regime detection – Price Action:** using an agglomerative clustering based on price action and volatility of major indices.

- Trend Following – Momentum:** Performance dashboard tracker of major indices and sectors.

II. Discretionary Idea Generation

- Global macroeconomic analysis :** Fundamental analysis of macroeconomic variables and Bottom-up global markets (Geopolitical Dynamics, Economic Landscape, Market Structure, Market Events ...).
- Bottom-up stock picking :** Fundamental Analysis of individual stocks through a bottom-up approach.

INITIAL
INVESTMENT
UNIVERSE =>
Regions,
countries and
sectors ...

Asset Screening & Analysis

1. ESG Screening

- Exclusions:** normatives & sectorials
- Best-in-class** strategy
- ETFs** ESG based
- Bonds:** Sovereign Bonds exclusion

2. Equity Screening

- Scoring system:** Through a designed scoring system based on 5 pillars (Earnings, Growth, Profitability, Momentum, Quality).
- Fundamental analysis:** performing an equity research note for major picked stocks.

3. Bonds Screening

- Duration positioning:** Adjusting portfolio duration based on the interest rate outlook and curve yield analysis.
- Fundamental analysis:** Yield, Credit, Quality, Spread, Liquidity, Issuer fundamentals.

Portfolio Construction

I. Portfolio optimization

- Black-Litterman Model:** We employ an approach combining Modern Portfolio Theory (MPT) and Bayesian analysis to integrate forward-looking views into the portfolio optimization process.

- Correlation assessment:** We conduct rigorous analysis of rolling correlations between financial assets to identify diversification opportunities and mitigate concentration risks.

II. Risk Management

- VaR & CVaR:** We utilize Value-at-Risk (VaR) and Conditional Value-at-Risk (CVaR) to measure and manage downside risk, ensuring our portfolio is resilient during market stress.

- SRI:** We closely track VEV and SRI Risk levels to align our portfolio risk objective.

III. Portfolio Monitoring

- Performance analysis:** We perform detailed performance attribution and contribution analysis to understand the drivers of returns and identify areas for improvement.
- Exposure:** We continuously monitor sectoral and geographic exposures to ensure alignment with our investment strategy and risk tolerance.

TCP Kenz Global Alpha Fund

Fund Strategy – Allocation & Positioning

	Start	Prior	Now	
 United States	●	●	●	⇒ Equity
	●	●	● ⁺¹	– US equities : We initially trimmed our U.S. equity exposure—as our regime-detector model signaled elevated policy and growth risks—and reduced holdings before the sell-off. Following the subsequent derating and more attractive valuations, we have begun to rebuild our U.S. allocation. Going forward, we will lean on a selective, stock-picking approach to capture upside while managing residual downside risk.
	●	●	●	– Small & Mid Cap US : We significantly reduce our position amid heightened macro uncertainty.
	●	● ⁰	●	– Sectors :
	● ⁻¹	●	●	– Financials : We reduced our overweight of financials but still one of our favorite sector, especially after the derating, and higher yields amid expectations of more less cuts due to higher expectation for inflation due to tariffs.
	●	●	●	– Staples : persistent weak earnings but good hedge in case of a US recession.
 Europe	● ⁺²	●	●	– Utilities : We are always holding it as a defensive hedge.
	●	● ⁺¹	● ⁺¹	– Software : Earnings picking up, defensive tech (Most companies beat in sales & earnings).
	●	●	●	– Communication services : we prefer it for recovering earnings and domestic exposure.
	●	●	●	– Styles : We keep low beta stocks to reduce the portfolios volatility during these times.
	●	●	●	⇒ Fixed Income
	●	●	●	– US Bonds : We maintain a short duration positioning on this segment to limit interest rate risk amid uncertainty regarding the future path of rates.
 Japan	● ⁺¹	● ⁻¹	● ⁻¹	⇒ Equity
	● ⁺¹	● ⁺¹	● ⁺¹	– European equities : We still favor Europe as we expect a rerating the next coming quarters as European GDP and EPS are expected to gradually increase this year.
	●	●	●	– Sectors :
	●	●	●	– Financials : the relative momentum continue to be strong ... capital returns, higher yields, and strong EPS.
	●	●	●	– Utilities : our second-favored as a hedge against weak growth and inflation
	●	●	●	– Consumer discretionary : We are always underweight given more exposure to tariffs risks and higher valuation.
	●	●	●	– Healthcare : tariffs risk
	●	●	●	– Industrials : We took some profits and now we are more selective
	●	●	●	– Staples : Weak momentum
	●	●	●	– Energy : no earnings support
	●	●	●	⇒ Fixed Income
	●	●	●	– EMU Bonds : In Europe, we maintain a tactically higher duration position, though still below our benchmark, due to the pressure on long-term rates—especially 10-year yields—since the beginning of the year.
	● ⁺¹	● ⁻¹	● ⁻¹	– We still hold Japanese equities as it provides diversification benefits, especially after the derating, which gives us very attractive valuation, we plan to add more if the economic situation starts to improve as well.

ESG Analysis and screening – “Delivering performance and purpose”

TCP Kenz Global Alpha Fund

Risk Management

3-MONTH VOLATILITY REPORT - TIME SERIES PERSPECTIVE

- Standard Deviation:** The portfolio's daily standard deviation remained significantly more stable compared to the benchmark during the tariff liberation day's spike episode on April 2nd.
- VaR-95% & CVaR-95%:** VaR and CVaR follow a similar trend as the standard deviation, where the benchmark significantly surpasses the thresholds.

STRESS TEST – MONTE CARLO METHOD

- Stress Test Monte Carlo Method:** The method involves simulating 1,000 scenarios with a 1.5x volatility shock on returns, while the risk metrics remain rooted in the GARCH model.
- Portfolio vs. Benchmark:** The stress test on our portfolio reveals improved returns accompanied by better-managed risk compared to the benchmark.

STRESS TEST – MONTE CARLO (GARCH Metrics)

Monte Carlo Stress Test - 40-Day Horizon

STANDARD DEVIATION (Daily, 5d sliding window)

VaR & CVaR - GARCH model (Weekly)

TCP Kenz Global Alpha Fund

Why invest in TCP Kenz Global Alpha Fund ?

We marry global macro insights with granular equity analysis to deliver resilient, responsible alpha.

A differentiated, macro-driven, multi-asset strategy with ESG at its core.

1

Why Invest in TCP Kenz Global Alpha ?

Agile exposure across equities, bonds & ETFs—capturing the best risk-adjusted opportunities wherever they arise

Anticipate economic inflection points via our proprietary nowcasting and price-action detectors

Best-in-Class Screening

Applies normative and sectoral exclusions across equities, bonds, and ETFs.

ESG as Performance Driver

Targets issuers with superior ESG metrics; integrates sustainability risks into every model.

Real-Time Risk Analytics

VaR/CVaR, scenario testing, drawdown controls and live exposure monitoring.

2

Why NOW, Why US ?

Volatile Changing markets

Trade policy swings, shifting growth/inflation dynamics—multi-asset agility is crucial

Fixed-Income Buffer

Fed on hold, yields elevated—high-quality bonds dampen equity drawdowns.

Our Investment Team

An experienced and renowned management team with a unique collegial decision-making approach.

Key Differences

Anticipate & adapt to economic inflection points

Blend systematic models with deep fundamental insight

Sustainability not just a filter, but a performance lever

Top-Down & Bottom-Up Approach

Combining broad macro signals with in-depth, company-level research to identify high-conviction ideas

Your Best-in Class
Choice !
